TAYLOR MADE PRODUCTS NOW OFFERS AERATORS & FOUNTAINS

GLOVERSVILLE, N.Y. – July 23, 2013– Taylor Made aerators and decorative aerators, commonly called fountains, are simple, mechanical devices. They offer an easy, cost effective solution to water quality problems in ponds and small lakes up to two acres.

“These environmentally friendly oil-free designs are the perfect choice,” says David Karpinski, vice president of sales and marketing for Taylor Made Products. “Great for back yard ponds, golf course ponds, retention ponds and ornamental ponds, these fountains offer the same benefits of aeration while providing an attractive display, which are ideal for ponds in the public eye.”

The new oil-free design has no chance of oil leaks that pollute our environment. Our models are up to 50% more energy efficient than oil filled brands, which in turn, costs less to operate. The high efficiency motor and high performance propeller gives the most flow for your energy dollar. Continuous duty 115v/60Hz or 230v/50/60Hz single-phase motors can run non-stop for years without maintenance and are rugged enough for fish farming. The motor shaft and motor housing are stainless steel, which eliminates corrosion. Motors are available in ½ HP, ¾ HP, 1 HP and 2 HP.

A molded glass filled nylon shroud guides water flow and protects fish, while dual internal seals and double lift shaft seals keep water and dirt out for a long life. Equipped with 50’ or 100’ field replaceable power chords, this kit can get you to the middle of the pond without modifications. The products are designed for harsh saltwater environments with a renewable zinc
