TAYLOR MADE PRODUCTS ADDS NEW DOCK PRO™ PROFILES

GLOVERSVILLE, N.Y. – July 23, 2013– Taylor Made Products is adding to its dock edging line of products with the Dock Pro™ Standard “P” Shape and Premium Side Gard, made from 85% recycled material. These products are created by a co-extrusion process, the same process as our other heavy-duty double molded profiles, which ensures increased durability and greater protection against the toughest docks.

“Continuing our GreenSolutions line is always of importance, but when we are able to combine our green initiative with a product that the largest OEM dock-builders choose, I’d say we are on top of the game” says David Karpinski, vice president of sales and marketing for Taylor Made Products.

These non-marking profiles have the same durometer as our fenders and are easily installed with screws or nails. Both styles are available in 10’ lengths with the choices of black or white and straight or coiled.

About Taylor Made Products

Taylor Made Products, a member of the Taylor Made Group, Inc.®, is one of the largest and most innovative suppliers of marine aftermarket products, including buoys, fenders, boat covers, bimini tops, dock products, flags, pennants and hardware.
